Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Built and deployed a production-ready TypeScript React website integrating 3 external APIs (Steam, Fab Marketplace, Resend), handling **5,000+ monthly active users** with automatic scaling and real-time game and asset data.
- Optimized API ingestion and server-side caching, reducing data processing overhead by **80%** and lowering page load times from 3.2s to 0.8s across 10+ product pages.
- Automated CI/CD pipeline with GitHub Actions for daily deployments to Vercel, managing DNS via Cloudflare and implementing GA4 tracking across 15+ user behavior events.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Integrated real-time MoveNet ML models with React, processing 30 FPS live camera streams with **<50ms latency** for gesture recognition using TensorFlow.js.
- Architected secure Express.js and Node.js backend with Redux Toolkit state management, supporting **200+ concurrent users** with encrypted API endpoints.
- Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest achieving **85% code coverage** and code quality enforcement through ESLint.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025

- Built Docker-based development environments and automated testing containers to ensure consistent application behavior across local, staging, and production stages.
- Facilitated weekly stand-ups and sprint retrospectives as Scrum Master, keeping the team aligned on project goals and delivering all tickets on time.
- Implemented database integration tests and submitted 2 MRs adhering to CI/CD pipeline standards, achieving **100% code review approval**.

Projects

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
- Implemented pattern matching with Regex to filter geographic plate data, ensuring accurate routing through EventBridge to trigger SES-based email notices.

Resume Automation MCP - LaTeX, YAML, GitHub Actions github.com

- Developed an automated pipeline that generates tailored resumes and cover letters from a versioned YAML data store using **LLM-driven content selection**.
- Engineered an automated CI/CD workflow using GitHub Actions to compile LaTeX source into production-ready PDFs upon every push.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, Go

Skills: Full-Stack Development, RESTful APIs, Event-Driven Architecture, Serverless, CI/CD, Agentic Workflows, SOLID Principles

Tools: React, Node.js, Docker, AWS (S3, SQS, EventBridge, Rekognition, SES), GitHub Actions, Jest, TensorFlow.js, Redux Toolkit
