Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Built and deployed a production-ready TypeScript React website integrating 3 external APIs (Steam, Fab Marketplace, Resend), handling **5,000+ monthly active users** with automatic scaling and real-time game/asset data and email notifications.
- Optimized API ingestion and server-side caching, reducing data processing overhead by **80%** and lowering page load times from 3.2s to 0.8s across 10+ product pages.
- Architected a modular React frontend following SOLID principles with custom hooks and context, achieving **45% reduction** in component re-renders and improving maintainability.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Developed secure and scalable RESTful APIs with Express.js and Node.js, supporting **200+ concurrent users** with Redux Toolkit state management.
- Automated testing with Jest (**85% code coverage**) and deployed via AWS Amplify CI/CD with ESLint code quality enforcement.
- Integrated real-time MoveNet ML models with React using TensorFlow.js, processing 30 FPS live camera streams with **<50ms latency** for gesture recognition.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Provided in-depth technical coaching to **40+ students** on relational schema design, query optimization, and Java unit testing patterns.
- Facilitated 6 workshops on MySQL Workbench for database visualization and management, improving lab completion rates by **25%**.
- Supported a classroom of 40+ students, ensuring all learners met course objectives and raising average assignment scores by 15%.

Projects

Stock Ratio Tracker - Python, React, TypeScript github.com

- Built a Python-based data ingestion and transformation layer to feed live financial metrics into a React-based frontend.
- Integrated JPMorgan Chase's Perspective library to generate live, interactive graphs for real-time trader monitoring.
- Implemented automated unit tests to ensure correctness and reliability of ratio calculations.

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
- Automated the violation detection workflow, reducing manual processing time by over **90%** using fully serverless architecture.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML, CSS

Skills: Full-stack Development, RESTful APIs, Relational Databases (MySQL), SOLID, Clean Code, Agile/Scrum, Collaboration

Tools: React, Node.js, Express.js, Redux Toolkit, Tailwind CSS, AWS Cloud Services, GitHub Actions, Git, Docker, Jira
