## Education

---

**Bellevue College** – BS in Computer Science – 3.6 GPA September 2021 – June 2025  
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

## Experience

---

**Sales Specialist**, Verizon – Covington, WA November 2025 – Current  
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.

- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.
- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.

**Associate Full Stack Developer**, Forge Tek Studios – Remote August 2025 – Current  
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management and performance.

- Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency and improve user experience.
- Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.

**Teaching Assistant**, Bellevue College – Bellevue, WA April 2024 – December 2024  
• Provided in-depth technical coaching on relational schema design, query optimization, and Java unit testing patterns for over 40 students.

- Facilitated workshops on MySQL Workbench for database visualization and management, enhancing foundational programming skills.
- Improved student success rates by 20% through targeted feedback and supplemental instruction in software engineering best practices.

## Projects

---

**Network-Wide Ad Blocker (Pi-hole)** - Linux, DNS, Shell Scripting [github.com](https://github.com)

- Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices, enhancing network privacy.
- Enhanced network-wide security and reduced bandwidth consumption by filtering malicious and tracking-heavy domains, improving page load speeds by 30%.

**Stock Ratio Tracker** - Python, React, Perspective [github.com](https://github.com)

- Built a Python-based data ingestion and transformation layer to feed live financial metrics into a React-based frontend via high-performance streaming.
- Increased trader decision-making efficiency by 40% through intuitive, real-time dashboard design and optimized state synchronization.

## Skills

---

**Languages:** Python, SQL, TypeScript, Java, JavaScript, Shell Scripting, MySQL, HTML/CSS

**Skills:** RESTful APIs, Technical Troubleshooting, Customer Relations, Consultative Selling, API Integration, Linux, DNS

**Tools:** React, Node.js, Perspective, Raspberry Pi, AWS Cloud Services, Git, Docker, CRM, Jira
