Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.
- Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
- Delivered a production-ready application that handled high traffic volumes with minimal infrastructure costs using serverless technologies.
- Managed the full production release lifecycle, including build pipelines, environment configs, and DNS to deliver a fully operational site used by real customers.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.
- Enhanced user engagement by 25% through the development of highly responsive and intuitive real-time visual feedback.
- Engineered a real-time, interaction-driven application using React and TensorFlow.js (MoveNet), processing live camera input and rendering responsive UI feedback.

Projects

Resume Automation MCP - Python, LLM, GitHub Actions github.com

- Reduced manual resume tailoring time by 90% by automating the data selection and document formatting process through an LLM-driven pipeline.
- Established a versioned “Source of Truth” for professional history, enabling instant iteration and consistent messaging across diverse job applications.
- Developed an automated CI/CD workflow using GitHub Actions to compile LaTeX source into production-ready PDFs upon every push.

MNIST Handwritten Digit Classifier - Python, NumPy github.com

- Built an Artificial Neural Network (ANN) from scratch to classify handwritten digits (0-9), achieving over 90% accuracy using the Backpropagation algorithm.
- Implemented gradient descent optimization and matrix-based weight updates, demonstrating a deep understanding of core machine learning principles.

Skills

Languages: Python, Go, TypeScript, Java, SQL, LaTeX, YAML, JavaScript, CSS

Skills: Consultative Solution-Selling, Technical Requirements Analysis, RESTful APIs, Prompt Engineering, LLM Implementation

Tools: Gemini CLI, Git, GitHub Actions, Docker, AWS (Rekognition, S3, Amplify), CRM Systems
