Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.
• Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.
• Contributed to regional sales targets by translating technical specifications into business value for diverse customer segments.

Web Design Intern, RSVP – Sai Gon, Vietnam July 2022 – September 2022
• Initiated and maintained relationships with small business clients, acting as a personal point of contact to ensure project alignment and build lasting trust.
• Recognized growth potential in early-stage client relationships, proactively offering design solutions that led to expanded project scopes.
• Communicated directly with international clients to translate branding requirements into design concepts.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Provided in-depth technical coaching on relational schema design, query optimization, and Java unit testing patterns for 40+ students.
• Mentored students on software engineering principles like documentation and testing as foundational career skills.
• Managed office hours and group labs, adapting teaching methods to suit diverse backgrounds and learning speeds.

Projects

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
• Automated the violation detection and notification workflow, reducing manual processing time by over 90%.

Network-Wide Ad Blocker (Pi-hole) - Shell Scripting, Linux, DNS github.com
• Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
• Enhanced network-wide security and reduced bandwidth consumption by filtering malicious and tracking-heavy domains.
