Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Architected a modular React frontend following SOLID principles with custom hooks and context, achieving **45% fewer component re-renders** and improving maintainability.
- Implemented intelligent caching for external APIs (Steam, Fab Marketplace), cutting API calls by **60%** through request deduplication and time-based caching.
- Built serverless endpoints with input validation and automated CI/CD pipelines using GitHub Actions for daily deployments to Vercel.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Developed secure and scalable RESTful APIs with Express.js and Node.js, supporting **200+ concurrent users** with encrypted endpoints.
- Automated testing with Jest achieving **85% code coverage**, and deployed via AWS Amplify CI/CD reducing manual testing time by **60%**.
- Implemented code quality enforcement through ESLint and maintained comprehensive technical documentation for team-wide reference.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Guided **40+ students** in Object-Oriented Programming (Java) and SQL through weekly labs, office hours, and supplementary tutoring sessions.
- Taught relational database design, query optimization, and MySQL Workbench, improving average project scores by **15%**.
- Coached students on JUnit testing and Javadoc documentation standards, raising assignment quality and reducing rework by **20%**.

Projects

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com

- Processed license plate images from S3 using AWS Rekognition, automating offender identification and routing events through SQS and EventBridge.
- Engineered a serverless notification pipeline using SES, delivering automated email alerts triggered by image analysis events.

Resume Automation MCP - LaTeX, YAML, GitHub Actions github.com

- Developed an automated pipeline generating tailored documents from a versioned data store, demonstrating system design and CI/CD automation.
- Engineered a GitHub Actions workflow to compile source files into production-ready PDFs upon every push, ensuring reliable artifact management.
- Built a modular data-injection system that dynamically selects and formats content based on role requirements, showcasing prompt engineering and content personalization.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML/CSS

Technologies: React, Express.js, RESTful APIs, Node.js, AWS (S3, SQS, EventBridge, Rekognition), Git, Jest, GitHub Actions

Interpersonal: Agile/Scrum, Technical Documentation, Cross-functional Collaboration, Debugging & Troubleshooting
