Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management and scalability.

- Implemented dynamic data fetching and caching strategies for third-party APIs (Steam, Fab Marketplace) to reduce latency and optimize data synchronization.
- Managed the full production release lifecycle, including build pipelines, environment configs, DNS, and hosting for high-traffic enterprise solutions.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Engineered a real-time, interaction-driven application using React and TensorFlow.js, processing live camera input and rendering responsive UI feedback.

- Architected secure and scalable RESTful APIs with Express.js and Node.js with a robust state management layer using Redux Toolkit.
- Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025
• Orchestrated Docker-based development environments to ensure consistent application behavior across local and staging stages.

- Resolved complex OED tickets in an Agile environment through the implementation of comprehensive database test cases.
- Led team progress as Scrum Master, ensuring timely delivery by coordinating cross-functional communications and removing blockers.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com
• Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.

- Used JPMorgan Chase's open-source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.
- Implemented automated unit tests to ensure correctness and reliability of data processing.

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.

- Engineered pattern matching with Regex to filter geographic plate data, ensuring accurate routing and automated notification generation via EventBridge and SES.

Skills

Languages: Java, JavaScript, Python, Node.js, TypeScript, Go, SQL, C++, HTML/CSS, Tailwind CSS

Skills: Full-stack Development, RESTful APIs, CI/CD, Agile/Scrum, API Integration, Unit Testing, AWS Rekognition

Tools: Docker, Kubernetes, React, Redux Toolkit, AWS (Amplify, S3, SQS, SES), Git, GitHub Actions, Linux
