Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.
• Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Integrated real-time machine learning models (MoveNet) with React to enable low-latency, gesture-based user interaction directly in the browser.
• Architected a secure backend using Express.js and Node.js with a robust state management layer using Redux Toolkit.
• Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025
• Orchestrated Docker-based development environments to ensure consistent application behavior across local and staging stages.
• Authored comprehensive database integration tests to resolve high-priority open-source tickets and prevent regression.
• Reduced manual testing overhead by 30% by automating core database verification scenarios.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com
• Built a Python-based data ingestion and transformation layer to feed live financial metrics into a React-based frontend.
• Optimized real-time data streaming and state synchronization between Python processes and Perspective visualization components.
• Implemented automated unit tests to ensure ratio calculation correctness and overall system reliability.

Reverse-Polish Calculator - Java, ANTLR, JUnit, OOP Concepts github.com
• Designed and implemented a grammar-driven parser using ANTLR and the Visitor pattern for abstract syntax tree traversal.
• Engineered stack-based evaluation logic to handle complex nested reverse-polish notation expressions.
• Achieved 100% test coverage for all arithmetic edge cases using JUnit-driven automated testing.

Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Skills: Test Automation, Unit Testing, Integration Testing, Database Testing, Agile/Scrum, RESTful APIs, CI/CD

Tools: JUnit, Jest, Docker, AWS Amplify, Postman, Git, Jira, React, Node.js
