Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.

- Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency.
- Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
- Owned the end-to-end development and deployment lifecycle of a full-stack project, ensuring high standards for code quality and performance.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Integrated real-time machine learning models (MoveNet) with React to enable low-latency, gesture-based user interaction directly in the browser.

- Developed secure and scalable RESTful APIs with Express.js and Node.js to manage data flow and backend communication.
- Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025

- Orchestrated Docker-based development environments to ensure consistent application behavior across local and staging stages.
- Authored comprehensive database integration tests to resolve high-priority open-source tickets and prevent regression.
- Drove project velocity as Scrum Master, meeting all client deadlines through proactive blocker removal and communication.

Projects

Read MNIST Handwritten Dataset - Python, NumPy github.com

- Engineered a multi-layer perceptron architecture from mathematical foundations, implementing forward and backward propagation without high-level ML libraries.
- Optimized matrix operations using NumPy vectorization to reduce training time and improve computational efficiency.
- Achieved over 90% accuracy on the test dataset, verifying model correctness and deep learning fundamentals.

Resume Automation MCP - LaTeX, YAML, GitHub Actions github.com

- Developed an automated pipeline that generates tailored resumes and cover letters from a versioned YAML data store using LLM-driven content selection.
- Engineered an automated CI/CD workflow using GitHub Actions to compile LaTeX source into production-ready PDFs upon every push.
- Created a modular data-injection system that dynamically pivots resume content to match specific role requirements.

Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, C++, Go, HTML/CSS, Node.js

Skills: Full-stack Development, RESTful APIs, Machine Learning Fundamentals, AI Workflow Automation, Agile/Scrum, Testing, CI/CD

Tools: React, Express.js, TensorFlow.js, NumPy, Docker, AWS Amplify, GitHub Actions, Serverless, Git, Jira
