Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Designed and deployed a serverless backend to keep costs low and servers flexible for high visitor traffic.
• Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
• Owned the end-to-end development and deployment lifecycle of a full-stack project, ensuring high standards for code quality and performance.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Architected a secure backend using Express.js and Node.js with a robust state management layer using Redux Toolkit to manage data flow.
• Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.
• Integrated real-time machine learning models (MoveNet) with React to enable low-latency, gesture-based user interaction directly in the browser.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025
• Orchestrated Docker-based development environments to ensure consistent application behavior across local and staging stages.
• Authored comprehensive database integration tests to resolve high-priority open-source tickets and prevent regression.
• Drove project velocity as Scrum Master, meeting all client deadlines through proactive blocker removal and communication.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com
• Built a Python-based data ingestion and transformation layer to feed live financial metrics into a React-based frontend.
• Optimized real-time data streaming and state synchronization between Python processes and Perspective visualization components to ensure low-latency updates.
• Implemented automated unit tests to ensure ratio calculation correctness and system reliability.

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
• Engineered Regex to identify California plates, routing events through SQS and EventBridge to trigger SES-based email notices.
• Automated the violation detection and notification workflow, reducing manual processing time by over 90%.

Skills

Languages: Python, Go, TypeScript, Java, SQL (MySQL), JavaScript, C++ , HTML/CSS

Skills: RESTful APIs, API Integration, Database Testing, Serverless Architecture, Clean Code, Scrum Master

Tools: Docker, Kubernetes, AWS Cloud Services (S3, SQS, EventBridge, SES), React, Node.js, Express.js, Redux Toolkit, Jest, Git
