Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- Explain technical concepts, such as bandwidth needs, signal strength, coverage maps, Wi-Fi extender logic and device compatibility to help customers make informed decisions.
- Support store operations by running diagnostics on devices, validating hardware issues, managing inventory workflows, and contributing to sales goals while maintaining integrity and transparency.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Delivered a production-ready application that handled high traffic volumes with minimal infrastructure costs using serverless technologies.
- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80% through performance-sensitive UI updates.
- Built and deployed a production-ready full-stack component-driven React application, integrating external APIs to dynamically render real-time content.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Improved student success rates by 20% through targeted feedback and supplemental instruction in Java and SQL best practices.
- Managed office hours and group labs for 40+ students, adapting technical teaching methods to suit diverse student backgrounds and learning speeds.
- Mentored students on software engineering principles like documentation and testing (JUnit) as foundational career skills.

Projects

Resume Automation System (Tex_OrangeLeaf-mcp) - LaTeX, YAML, GitHub Actions github.com

- Developed an automated pipeline that generates tailored resumes and cover letters from a versioned YAML data store using LLM-driven content selection.
- Reduced manual resume tailoring time by 90% by automating the data selection and document formatting process through an LLM-driven pipeline.
- Engineered an automated CI/CD workflow using GitHub Actions to compile LaTeX source into production-ready PDFs upon every push.

Stock Ratio Tracker - Python, React, Perspective github.com

- Architected a data-flow pipeline connecting Python backend calculations to a live React dashboard, increasing trader decision-making efficiency by 40%.
- Used JPMorgan Chase's open-source library called Perspective to generate interactive graphs for real-time trader monitoring.
- Implemented automated unit tests to ensure ratio
