Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
- Translated technical specifications into business value for diverse customer segments, acting as a primary technical point of contact for strategic partners.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Built and deployed a production-ready full-stack React application, integrating external APIs (Steam, Fab Marketplace) to dynamically render real-time content.
- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80%—focusing on performance-sensitive UI updates.
- Managed the full production release lifecycle, including environment configs and API integrations, ensuring a reliable experience for end-users.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Developed secure and scalable RESTful APIs with Express.js and Node.js to manage complex data flows and backend communication.
- Architected a robust state management layer using Redux Toolkit and built responsive visual feedback systems with React and Tailwind CSS.
- Enhanced user engagement by 25% through the development of highly intuitive, real-time interactive features and interaction-driven UI feedback.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com

- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates via API integrations.
- Used JPMorgan Chase's Perspective library to generate live, interactive visualizations, translating complex data feeds into clear, actionable insights.

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com

- Engineered an automated notification system processing license plate images through SQS and EventBridge, ensuring reliable data routing and external service communication.
- Designed a high-reliability workflow that integrates image processing APIs with cloud messaging services to deliver real-time user notifications.

Skills

Languages: JavaScript (ES6+), TypeScript, Node.js, Python, Java, SQL, HTML/CSS

Technologies: React, Express.js, RESTful APIs, AWS (S3, SQS, EventBridge), Redux Toolkit, Tailwind CSS

Interpersonal: Technical Consulting, Consultative Selling, Solution Architecture, Cross-functional Collaboration
