Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Contributed to regional sales targets by translating complex technical specifications (bandwidth, network topology, signal propagation) into business value for diverse customer segments.
• Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust for complex service offerings.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Present
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic for production-ready full-stack applications.
• Implemented dynamic data fetching and caching strategies for third-party APIs (Steam, Fab Marketplace) to reduce latency and improve user experience.
• Managed the full production release lifecycle, including build pipelines, environment configs, DNS, and hosting to deliver fully operational sites.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Architected a secure backend using Express.js and Node.js with a robust state management layer using Redux Toolkit to manage data flow and backend communication.
• Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint to ensure production stability.
• Integrated real-time machine learning models (MoveNet) with React to enable low-latency user interaction directly in the browser.

Projects

Traffic Violation Detection System - AWS, JavaScript, Rekognition github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing to handle bursty traffic.
• Implemented pattern matching with Regex to filter geographic plate data, ensuring accurate routing and notice generation through SES.
• Automated the violation detection and notification workflow, reducing manual processing time by over 90%.

Stock Ratio Tracker - Python, React, TypeScript github.com
• Increased trader decision-making efficiency by 40% through the design of an intuitive, real-time dashboard visualizing financial price ratios.
• Built a Python-based data ingestion layer to feed live financial metrics into a React-based frontend using JPMorgan Chase's Perspective library.
• Optimized real-time data streaming and state synchronization between Python processes and visualization components.

Skills

Languages: Python, TypeScript, JavaScript, SQL, Bash, HTML, CSS, Java, C++

Skills: API Integration, Technical Troubleshooting, SaaS Ecosystems, Requirement Elicitation, Consultative Sales

Tools: AWS (SQS, EventBridge, Rekognition, Amplify, S3), React, Node.js, Redux Toolkit, Git, Docker, CRM
