Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Owned the end-to-end development and deployment lifecycle of full-stack projects, ensuring high standards for code quality and performance in a self-directed environment.
- Architected modular frontend systems with serverless backends, optimizing data synchronization logic to reduce system load by 80%.
- Collaborated on architecture decisions, advocating for scalable technical solutions to meet demanding customer and traffic requirements.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Provided in-depth technical coaching and workshops on relational schema design, query optimization, and Java testing patterns for 40+ students.
- Mentored students on software engineering principles and documentation as foundational career skills, improving overall success rates by 20%.
- Managed office hours and labs, adapting communication methods to suit diverse backgrounds and learning speeds.

Projects

Network-Wide Ad Blocker (Pi-hole) - Shell, Linux, Raspberry Pi, DNS github.com

- Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
- Diagnosed and resolved network routing conflicts to ensure zero-latency ad blocking and stable network performance.
- Verified system behavior through log inspection and iterative configuration changes to ensure reliable operation in a home-lab environment.

Traffic Violation Detection System - Javascript, AWS Cloud Services, Regex github.com

- Processed license plate images from S3 using AWS Rekognition, automating the identification of specific plate types via Regex.
- Engineered a data-routing pipeline through SQS and EventBridge to handle violation details and automated notifications.
- Managed end-to-end data flow from image ingestion to database updates, ensuring system integrity and accuracy.

Skills

Languages: Python, TypeScript, Java, SQL (MySQL), JavaScript, Shell Scripting, C++, HTML/CSS

Skills: Technical Sales, Customer Relations, Troubleshooting, CRM, Documentation, Full-stack

Tools: Linux, Raspberry Pi, Networking (DNS), AWS, Docker, Git, React, Node.js, Jira
