Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Explain complex technical concepts, such as signal strength, coverage maps, and device compatibility, to help customers and business clients make informed decisions.
• Streamlined inventory workflows and device diagnostic processes, reducing wait times and improving store operational efficiency.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Managed the full production release lifecycle, including environment configs and hosting, ensuring high standards for project delivery and performance.
• Built and deployed production-ready applications, coordinating project requirements and design details to ensure products were completed accurately.
• Optimized data synchronization and rendering logic, reducing ingestion overhead by 80%—focusing on reliability and maintainability for the end-user.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Provided in-depth technical coaching on complex systems and design patterns to a classroom of 40+ students with diverse backgrounds.
• Facilitated workshops on technical visualization and management tools, improving foundational proficiency and assignment quality by 20%.
• Mentored students on engineering principles like documentation and verification as foundational practices for building stable and secure systems.

Projects

Automated Document Generation Pipeline - Python, YAML, GitHub Actions github.com
• Architected an automated pipeline that programmatically generates tailored technical documentation from a versioned YAML data store.
• Reduced manual tailoring time by 90% by automating the data selection and document formatting process through an LLM-driven orchestration engine.
• Engineered automated CI/CD workflows with GitHub Actions to ensure consistent, environment-independent builds and artifact management.

Traffic Violation Detection System - AWS, JavaScript, Event-Driven Architecture github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled, resilient message processing.
• Implemented pattern matching with Regex to filter and route geographic data, triggering automated notification workflows via SES.
• Leveraged S3 and EventBridge to build a scalable, cost-efficient solution for real-time data ingestion and automated analysis.

Skills

Languages: Python, Java, JavaScript, SQL (MySQL), TypeScript, LaTeX, YAML, HTML, CSS

Skills: Technical Support, Consultative Sales, Project Coordination, Technical Documentation, Data Analysis, CI/CD

Tools: Windows/macOS/Linux, GitHub Actions, Docker, React, Node.js, CRM, AWS SQS/S3, MySQL Workbench
