Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
- Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Designed and deployed a serverless backend to keep costs low and servers flexible for high visitor traffic, managing the full production release lifecycle.
- Built and deployed a production-ready component-driven React application, integrating external APIs to dynamically render real-time content.
- Reduced system load and ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint.
- Engineered a real-time application using React and TensorFlow.js, processing live camera input and rendering responsive UI feedback.
- Developed secure and scalable RESTful APIs with Express.js and Node.js to manage data flow and backend communication.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com

- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.
- Used JPMorgan Chase's open-source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.
- Implemented automated unit tests to ensure correctness and reliability.

Network-Wide Ad Blocker (Pi-hole) - Linux, DNS, Networking github.com

- Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices, reducing bandwidth consumption.
- Diagnosed and resolved network routing conflicts to ensure zero-latency ad blocking and improved page load speeds by 30%.
- Configured DNS services and network routing from scratch, verifying system stability through log inspection and connectivity testing.

Skills

Languages: Python, Go, TypeScript, Java, SQL, JavaScript, Linux (Shell), MySQL, Tailwind CSS

Skills: Cloud Computing, Sales Prospecting, Technical Troubleshooting, RESTful APIs, CRM (Salesforce), Full-stack

Tools: AWS Amplify, AWS Cloud Services, Serverless, React, Docker, Jira, Git, DNS, Pi-hole
