Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Architected a modular React frontend following SOLID principles with custom hooks and context, achieving 45% reduction in component re-renders and improving maintainability.
- Implemented intelligent caching for Steam and Fab Marketplace APIs, cutting API calls by 60% through request deduplication and 5-minute TTL caching.
- Delivered a production application serving 5,000+ MAU with 99.9% uptime, zero infrastructure downtime during daily Vercel deployments.
- Built a serverless contact form endpoint using the Resend API with input validation and HTML email templating, handling reliable email delivery without managing SMTP infrastructure.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Integrated real-time MoveNet ML models with React following SOLID principles, processing 30 FPS live camera streams with under 50ms latency for gesture recognition.
- Architected secure Express.js and Node.js backend with Redux Toolkit state management, supporting 200+ concurrent users with encrypted API endpoints.
- Automated testing with Jest (85% code coverage) and deployed via AWS Amplify CI/CD, reducing manual testing time by 60% and achieving 90% sprint velocity.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025

- Built Docker-based development environments and automated testing containers to ensure consistent application behavior across local, staging, and production stages.
- Implemented database integration tests and submitted 2 merge requests adhering to CI/CD pipeline standards, achieving 100% code review approval.
- Led a 3-person team as Scrum Master across 2-week sprints, resolving 2 OED tickets through daily stand-ups with 100% on-time sprint delivery.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com

- Built a Python-based data ingestion and transformation layer to feed live financial metrics into a React-based frontend.
- Optimized real-time data streaming and state synchronization between Python processes and Perspective visualization components.
- Implemented automated unit tests to ensure correctness and reliability of ratio calculations.

Resume Automation MCP - LaTeX, YAML, GitHub Actions github.com

- Developed an automated pipeline that generates tailored documents from a versioned YAML data store using LLM-driven content selection.
- Configured GitHub Actions workflows to automate builds and artifact management, ensuring consistent, environment-independent output.
- Created a modular data-injection system that dynamically pivots resume content (technical, impact, leadership) to match specific role requirements.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: Java, Kotlin, Python, TypeScript, JavaScript, Go, SQL, C++

Skills: RESTful APIs, Full-stack, API Design, Data Modeling, Systems Design, Automated Testing, CI/CD, Observability, Agile, Scrum, SOLID, Clean Code

Tools: React, Node.js, Express.js, Docker, GitHub Actions, AWS Cloud Services, Redux Toolkit, Tailwind CSS, Jest, ESLint, LLM/AI Coding Assistants
