Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
• Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Provided in-depth technical coaching on relational schema design, query optimization, and Java unit testing patterns for 40+ students.
• Mentored students on software engineering principles like documentation (Javadoc) and testing (JUnit) as foundational career skills.
• Improved student success rates by 20% through targeted feedback and supplemental instruction in Java best practices.

Projects

Network-Wide Ad Blocker (Pi-hole) - Shell, Linux, Raspberry Pi, DNS github.com
• Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
• Diagnosed and resolved network routing conflicts to ensure zero-latency ad blocking and stable network performance.
• Improved page load speeds by 30% through proactive ad blocking and DNS caching, verified through log inspection.

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com
• Processed license plate images from S3, sending email notices to offenders with violation details and fines.
• Engineered Regex to identify California plates, routed through SQS and EventBridge for proper handling.

Skills

Languages: Python, TypeScript, Java, SQL (MySQL), JavaScript, Go, C++ , HTML/CSS

Skills: Technical Sales, Customer Relations, Observability, RESTful APIs, Troubleshooting, Full-stack

Tools: Linux, Raspberry Pi, DNS, React, Node.js, AWS, Docker, Git, Perspective, JUnit
