Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers, ensuring world-class support.
• Conducted hardware diagnostics and firmware validation on mobile devices and networking equipment to identify and mitigate technical concerns.
• Consistently surpassed monthly targets by achieving 130% of goals through technical product expertise and consultative problem-solving.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management and data analysis.
• Built and deployed production-ready applications, integrating third-party APIs to dynamically render real-time content while maintaining high availability and security.
• Owned the end-to-end development lifecycle, advocating for scalable solutions to meet customer requirements and performance standards.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Provided in-depth technical coaching on Java, SQL, and relational schema design to a classroom of 40+ students, adapting methods to suit diverse backgrounds.
• Facilitated workshops on MySQL Workbench for database visualization and management, improving student success rates by 20%.
• Mentored students on software engineering principles like documentation and unit testing as foundational skills for building stable and secure platforms.

Projects

Automated Document Generation Pipeline - Python, YAML, GitHub Actions github.com
• Developed an automated pipeline that programmatically generates tailored technical documentation from a versioned YAML data store using LLM-driven content selection.
• Reduced manual processing time by 90% by automating data selection and document formatting through an orchestration engine and CI/CD workflows.
• Engineered automated workflows with GitHub Actions to ensure consistent, environment-independent builds and artifact management.

Traffic Violation Detection System - AWS, JavaScript, Event-Driven Architecture github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled, resilient message processing.
• Implemented pattern matching with Regex to filter geographic data and trigger automated notification workflows via EventBridge and SES.
• Leveraged S3 and Lambda to build a scalable solution for real-time data ingestion and analysis, reducing system load and operational costs.

Skills

Languages: Java, SQL (MySQL), Python, JavaScript, TypeScript, PowerShell, Bash, C++, PHP, LaTeX, YAML

Skills: Technical Support, Problem Solving, Full-stack, Data Analytics, Systems Administration, CI/CD, RDBMS

Tools: Linux, Windows, AWS, React, Node.js, GitHub Actions, Docker, MySQL Workbench, CRM
