Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Streamlined inventory workflows and device diagnostic processes, reducing customer wait times and improving store operational efficiency.
• Contributed to regional sales targets by translating complex specifications into business value for diverse customer segments.

Coding Competition Developer, Bellevue College – Bellevue, WA April 2024 – May 2025
• Directed onsite technical operations for 30+ participants, ensuring a seamless competition experience and efficient coordination of physical and digital resources.
• Reduced administrative overhead by 40% through the development of automated backend updates for real-time tracking and reporting.
• Enhanced user interfaces for onsite monitoring, boosting overall operational efficiency and stakeholder satisfaction by 30%.

Front Desk Assistant, Public Safety Department, Bellevue College – Bellevue, WA June 2023 – August 2023
• Improved administrative efficiency by organizing digital records and streamlining visitor check-in processes using Microsoft Word, Excel, and Outlook.
• Reduced inquiry volume by 15% through more effective informational design and proactive communication of department protocols.
• Managed tasks with high precision in a fast-paced environment, collaborating with team members to ensure accurate and prompt assistance.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com
• Architected a data-flow pipeline to monitor and visualize live metrics, ensuring stable, low-latency updates for time-sensitive decision making.
• Implemented automated data validation and unit tests to ensure 100% accuracy and reliability of reported information.
• Leveraged open-source visualization tools to present complex data feeds in a clear, actionable format for end-users.

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com
• Engineered an automated notification system to process data triggers and distribute detailed alerts, reducing manual administrative processing time.
• Implemented regex-based data validation and automated routing to ensure accurate handling of high-volume event streams.
