Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Built and deployed a production-ready TypeScript React website integrating 3 external APIs, handling **5,000+ monthly active users** with automatic scaling and real-time data rendering.
- Optimized API ingestion and server-side caching, reducing data processing overhead by **80%** and lowering page load times from 3.2s to 0.8s across 10+ product pages.
- Automated CI/CD pipeline with GitHub Actions for daily deployments, registered DNS via Cloudflare, and implemented GA4 tracking across 15+ user behavior events.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Engineered a real-time, interaction-driven application using React and TensorFlow.js (MoveNet), processing live camera input and rendering responsive UI feedback.
- Developed secure and scalable RESTful APIs with Express.js and Node.js to manage data flow and backend communication.
- Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest (**85% coverage**) and code quality enforcement through ESLint.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025

- Led 3-person team as Scrum Master across 2-week sprints, resolving open-source tickets through daily stand-ups and **100% on-time sprint delivery**.
- Containerized development and testing workflows using Docker, reducing environment-related bugs by **25%** and cutting setup time by **40%**.
- Submitted 2 merge requests with database integration tests, achieving **100% code review approval** within 24 hours following CI/CD pipeline standards.

Projects

Reverse-Polish Calculator - Java, ANTLR, JUnit github.com

- Designed and implemented a grammar-driven parser using ANTLR and the Visitor pattern for abstract syntax tree traversal.
- Engineered stack-based evaluation logic to handle complex nested reverse-polish notation expressions.
- Achieved **100% test coverage** for all arithmetic edge cases using JUnit-driven automated testing.

Resume Automation MCP - LaTeX, YAML, GitHub Actions, LLM github.com

- Architected a document generation system using LaTeX and YAML, implementing strict separation of concerns between data storage and rendering.
- Configured GitHub Actions workflows to automate LaTeX compilation and artifact management, ensuring consistent, environment-independent builds.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: Java, Python, C++, JavaScript, TypeScript, SQL, HTML, CSS

Skills: Data Structures & Algorithms, OOP, Agile/Scrum, RESTful APIs, CI/CD, Debugging & Troubleshooting, Code Documentation, Code Review

Tools: Git, GitHub Actions, Docker, JUnit, Jest, Node.js, Express.js, AWS (Amplify, S3, SQS, EventBridge, SES)
