Experience

- Associate Full Stack Developer**, Forge Tek Studios – Remote August 2025 – Current
- Built and deployed a production-ready TypeScript React website integrating 3 external APIs, handling **5,000+ MAU** with automatic scaling and real-time data delivery.
 - Optimized API ingestion and server-side caching, reducing data processing overhead by **80%** and lowering page load times from 3.2s to 0.8s across 10+ product pages.
 - Automated CI/CD pipeline with GitHub Actions for daily deployments to Vercel and implemented GA4 tracking across 15+ user behavior events.
- Full Stack Developer Intern**, METY Technology – Remote September 2024 – June 2025
- Engineered a real-time application using React and TensorFlow.js, processing 30 FPS live camera input with **<50ms latency** for responsive gesture recognition.
 - Developed secure RESTful APIs with Express.js and Node.js supporting **200+ concurrent users** with encrypted endpoints and Redux Toolkit state management.
 - Built and maintained a CI/CD pipeline using AWS Amplify with automated Jest testing (**85% coverage**) and code quality enforcement through ESLint.
- Coding Competition Developer**, Bellevue College – Bellevue, WA April 2024 – May 2025
- Built a dynamic leaderboard system using PHP and SQL for real-time performance tracking during competitive coding events.
 - Authored automated test cases across 5 languages to validate participant submissions for algorithm accuracy and efficiency.
 - Enhanced web interfaces with HTML and CSS, improving participant satisfaction by **30%** through responsive UI design.

Projects

- Resume Automation MCP** - LaTeX, YAML, GitHub Actions, LLM github.com
- Architected a document generation system using LaTeX and YAML, implementing strict separation of concerns between data storage and rendering.
 - Configured GitHub Actions workflows to automate LaTeX compilation and artifact management, ensuring consistent, environment-independent builds.
 - Developed an LLM-driven content selection pipeline that dynamically tailors resume content to match specific role requirements.
- Traffic Violation Detection System** - JavaScript, AWS Cloud Services github.com
- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
 - Implemented Regex-based filtering to route events through EventBridge and trigger SES-based automated email notifications.
 - Automated the violation detection workflow, reducing manual processing time by over **90%** using fully serverless architecture.

Education

- Bellevue College** – BS in Computer Science – 3.6 GPA September 2021 – June 2025
- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: JavaScript, TypeScript, Python, PHP, SQL, Java

Skills: RESTful APIs, Full-stack Development, CI/CD, Automated Testing, Git, Documentation, AI/LLM Prompting

Tools: React, Node.js, Express.js, MySQL, Docker, GitHub Actions, AWS, Linux
