Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Conducted hardware diagnostics and firmware validation on mobile devices and networking equipment to ensure optimal performance and connectivity.
• De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
• Streamlined inventory workflows and device diagnostic processes, reducing customer wait times and improving store operational efficiency.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Owned the end-to-end development and deployment lifecycle of a full-stack project, ensuring high standards for code quality and performance.
• Managed the full production release lifecycle, including build pipelines, environment configs, DNS, and hosting to deliver fully operational sites.
• Designed and deployed a serverless backend to keep costs low and infrastructure flexible for varying traffic volumes.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Engineered a real-time application using React and TensorFlow.js, processing live camera input to enable responsive, gesture-based user interactions.
• Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint.
• Mentored junior interns on technical integration and development, fostering a collaborative and learning-oriented environment.

Projects

Network-Wide Ad Blocker (Pi-hole) - Shell Scripting, Linux, DNS github.com
• Engineered a custom network-layer security solution using Linux and Raspberry Pi to filter DNS traffic across all connected devices.
• Configured DNS services and network routing from scratch, diagnosing and resolving connectivity conflicts to ensure stable operation.
• Verified system behavior through log inspection and iterative configuration changes to ensure reliable, zero-latency ad blocking.

Traffic Violation Detection System - Javascript, AWS, Machine Learning github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
• Automated the violation detection and notification workflow, reducing manual processing time by over 90% through pattern-matching and regex.
• Managed the end-to-end cloud infrastructure configuration and deployment of the detection system.

Skills

Languages: Python, TypeScript, JavaScript, SQL, Shell Scripting, Java, HTML/CSS

Skills: Hardware Diagnostics, Network Troubleshooting, DNS Configuration, Technical Training, Deployment Lifecycle, Site Surveys, Pre-sales, AWS Infrastructure

Tools: Linux, Raspberry Pi, React, Node.js, AWS Rekognition, Git, Docker, Jira, CRM
