Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
• Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Owned the end-to-end development and deployment lifecycle of full-stack projects, ensuring high standards for code quality and performance with minimal supervision.
• Architected modular React systems and optimized data synchronization logic, reducing ingestion overhead by 80% for high-traffic environments.
• Collaborated across teams to map complex requirements to scalable technical solutions, advocating for architecture that balances cost and performance.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Provided in-depth technical coaching and workshops on relational schema design and optimization for a classroom of 40+ students.
• Mentored students on software engineering principles and documentation, improving overall proficiency and project success rates by 20%.
• Adapted communication methods to suit diverse technical backgrounds, ensuring clear understanding of foundational engineering concepts.

Projects

Network-Wide Ad Blocker (Pi-hole) - Shell, Linux, Raspberry Pi, DNS github.com
• Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
• Diagnosed and resolved network routing conflicts to ensure zero-latency ad blocking and stable network performance.
• Independently researched and implemented a home-lab solution for enhanced personal data privacy and network-wide security.

Stock Ratio Tracker - Python, React, Typescript, Perspective github.com
• Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring low-latency updates.
• Integrated JPMorgan Chase's Perspective library to generate interactive graphs for real-time monitoring of financial metrics.
• Optimized data streaming and state synchronization between backend processes and visualization components to increase decision-making efficiency.

Skills

Languages: Python, TypeScript, Java, SQL (MySQL), JavaScript, Go, C++ , Shell Scripting, HTML/CSS

Skills: Technical Sales, Customer Relations, Account Management, Troubleshooting, Data Visualization, Full-stack

Tools: Linux, Raspberry Pi, Networking (DNS), React, Node.js, AWS, Docker, Git, Perspective, Microsoft Teams
