Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management and dynamic data fetching from third-party APIs like Steam.

- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80%—focusing on performance-sensitive UI updates.
- Managed the full production release lifecycle, including build pipelines, environment configs, DNS, and hosting to deliver a fully operational site used by real customers.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Developed secure and scalable RESTful APIs with Express.js and Node.js to manage data flow and backend communication, utilizing Redux Toolkit for robust state management.

- Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify using Jest and ESLint, ensuring consistent delivery and quality standards.
- Integrated real-time machine learning models (MoveNet) with React to enable low-latency user interaction directly in the browser.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025
• Orchestrated Docker-based development environments to ensure consistent application behavior across local and staging stages.

- Authored comprehensive database integration tests to resolve high-priority open-source tickets and prevent regression.
- Drove project velocity as Scrum Master, meeting all client deadlines through proactive blocker removal and communication.

Projects

Resume Automation MCP - LaTeX, YAML, GitHub Actions github.com
• Architected a document generation system using LaTeX and YAML, implementing an automated pipeline that generates tailored resumes using LLM-driven content selection.

- Configured GitHub Actions workflows to automate LaTeX compilation and artifact management, ensuring consistent, environment-independent builds.
- Reduced manual resume tailoring time by 90% by automating the data selection and document formatting process through an LLM-driven pipeline.

Network-Wide Ad Blocker (Pi-hole) - Bash, SSH, Raspberry Pi 4, Linux

- Deployed Pi-hole on a Raspberry Pi 4, performing full OS installation and headless configuration to manage the system remotely via SSH and Bash terminal.
- Configured DNS services and network routing from scratch, ensuring stable and reliable ad blocking across all connected devices.
- Verified system behavior through log inspection and iterative configuration changes to optimize network performance.

Skills

Languages: JavaScript, TypeScript, Bash, Python, SQL, Java, Go, LaTeX, YAML

Skills: API Integration (REST, GraphQL), Internal Tools, CI/CD, Automation, LLM Integration, Agile/Scrum

Tools: Docker, GitHub Actions, SSH, Git, Node.js, React, AWS, Claude Code, Cursor, Linux
