Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
• Conducted hardware diagnostics and firmware validation on mobile devices and networking equipment to ensure optimal performance.
• Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Built and deployed a production-ready full-stack component-driven React application, integrating external APIs to dynamically render real-time content.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
• Owned the end-to-end development and deployment lifecycle of a full-stack project, ensuring high standards for code quality and performance.
• Designed and deployed a serverless backend to keep costs low and servers flexible for high visitor traffic.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Improved student success rates by 20% through targeted feedback and supplemental instruction in Java best practices and relational database design.
• Managed office hours and group labs for 40+ students, adapting technical teaching methods to suit diverse backgrounds and learning speeds.
• Mentored students on software engineering principles like documentation and testing as foundational career skills.

Projects

Traffic Violation Detection System - AWS, Javascript, Rekognition [github.com](#)
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
• Automated the violation detection and notification workflow, reducing manual processing time by over 90% through automated pattern matching and email triggers.

Stock Ratio Tracker - Python, React, Typescript [github.com](#)
• Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.
• Used JPMorgan Chase's open-source library Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.

Skills

Languages: Python, TypeScript, JavaScript, SQL, C++ , Java, HTML, CSS, PHP, Golang, LaTeX

Skills: Technical Troubleshooting, Network Topology, Relationship-Based Sales, CRM (Salesforce), Consultative Selling, Solution Proposing, B2B Account Management

Tools: Salesforce, AWS Cloud Services (Rekognition, S3, SQS), React, Git, GitHub Actions, Docker, Figma, Node.js, Perspective
