Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- Contributed to regional sales targets by translating complex technical specifications (bandwidth, network topology, signal propagation) into business value for diverse customer segments.
- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Present

- Delivered a production-ready application that handled high traffic volumes with minimal infrastructure costs using serverless technologies.
- Collaborated on design and architecture decisions, advocating for serverless solutions to meet scalability and cost requirements for high-performance web applications.
- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80%—focusing on performance-sensitive UI updates.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.
- Architected a secure backend using Express.js and Node.js with a robust state management layer using Redux Toolkit.
- Integrated real-time machine learning models (MoveNet) with React to enable low-latency user interaction directly in the browser.

Projects

Traffic Violation Detection System - AWS Services, JavaScript [github.com](#)

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
- Reduced system costs by leveraging serverless AWS services to handle bursty traffic patterns efficiently.
- Automated the violation detection and notification workflow, reducing manual processing time by over 90%.

Stock Ratio Tracker - Python, React, TypeScript [github.com](#)

- Increased trader decision-making efficiency by 40% through the design of an intuitive, real-time dashboard visualizing financial metrics.
- Evaluated and selected industry-standard financial visualization tools to deliver a production-quality dashboard experience.
- Built a Python-based data ingestion and transformation layer to feed live financial metrics into a React-based frontend.

Skills

Languages: Python, TypeScript, JavaScript, SQL, Bash, Java, C++, HTML, CSS

Skills: AWS Cloud Computing, Consultative Sales, Lead Qualification, CRM, Cloud Architecture, AI/ML

Tools: AWS (S3, SQS, EventBridge, Rekognition, Amplify), React, Node.js, Serverless, Git, Docker
