Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.

- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
- Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Built and deployed a production-ready full-stack component-driven React application, integrating external APIs (Steam, Fab Marketplace) to dynamically render real-time content.

- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80%—focusing on performance-sensitive UI updates.
- Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Managed office hours and group labs, adapting teaching methods to suit diverse student backgrounds and learning speeds.

- Mentored students on software engineering principles like documentation (Javadoc) and testing (JUnit) as foundational career skills.
- Provided in-depth technical coaching on relational schema design, query optimization, and Java unit testing patterns.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com

- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.
- Integrated Perspective to generate live, interactive graphs for trader monitoring, reducing data visualization latency.
- Implemented automated unit tests to ensure ratio calculation correctness and reliability.

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
- Automated the violation detection and notification workflow, reducing manual processing time by over 90%.

Skills

Languages: Python, JavaScript, TypeScript, Java, Go, SQL (MySQL), CSS (Tailwind)

Skills: RESTful APIs, API Integration, SaaS Concepts, JSON, Full-stack Development, Customer Success, Technical Troubleshooting

Tools: AWS (S3, SQS, EventBridge, SES, Rekognition, Amplify), React, Node.js, Express.js, Perspective, Docker, Git
