Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Explain technical concepts, such as bandwidth needs, signal strength, coverage maps, and device compatibility, to help customers make informed decisions and solve complex business problems.
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Translated technical specifications into tangible business value for diverse customer segments, building long-term trust and strategic partnerships.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Built and deployed a production-ready full-stack component-driven React application, integrating external APIs to dynamically render real-time content for end-users.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic, focusing on performance-sensitive UI updates.
• Owned the end-to-end development and deployment lifecycle, ensuring high standards for code quality, scalability, and user experience.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Engineered a real-time, interaction-driven application using React and TensorFlow.js (MoveNet), processing live camera input and rendering responsive visual feedback.
• Enhanced user engagement by 25% through the development of highly responsive and intuitive real-time interaction systems.
• Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and high quality standards.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com
• Architected a data-flow pipeline connecting Python backend calculations to a live React dashboard for real-time monitoring of financial ratios.
• Used JPMorgan Chase's Perspective library to generate live, interactive visualizations of complex data feeds for clear decision-making.
• Implemented automated unit tests to ensure high data integrity and reliability of technical calculations.

MNIST Handwritten Digit Classifier - Python, Numpy Library github.com
• Built an Artificial Neural Network (ANN) from scratch to classify handwritten digits, demonstrating a deep understanding of machine learning foundations and algorithm implementation.
• Achieved over 90% accuracy using the Backpropagation algorithm, optimized through NumPy vectorization for computational efficiency.

Skills

Languages: Python, Go, TypeScript, Java, Kotlin, C++ , Next.js, JavaScript, MySQL, Tailwind CSS

Skills: Consultative Selling, Technical Presentations, RESTful APIs, Machine Learning (ML), Full-stack, Collaboration

Tools: Gen AI/ML, React, Redux Toolkit, Docker, Jira, AWS Cloud Services, TensorFlow.js, NumPy
