Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.

- De-escalated complex technical issues by explaining network topology, bandwidth optimization, and signal propagation to customers, serving as their primary technical advisor.
- Conducted hardware diagnostics and firmware validation on mobile devices and networking equipment to ensure optimal performance and security readiness.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Built and deployed production-ready SaaS-style React applications, integrating external APIs to dynamically render real-time content while maintaining high availability.

- Optimized client-side rendering and data synchronization, reducing ingestion overhead by 80%—focusing on performance-sensitive UI updates and data integrity.
- Delivered a production-ready application that handled high traffic volumes with minimal infrastructure costs using serverless technologies on cloud platforms.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Provided technical coaching on relational schema design, query optimization, and Java unit testing patterns to a classroom of 40+ students.

- Mentored students on software engineering principles like documentation and testing (JUnit) as foundational practices for building stable and secure platforms.
- Facilitated workshops on MySQL Workbench for database visualization, helping students articulate complex technical concepts in structured presentations.

Projects

Automated Document Generation Pipeline - Python, YAML, GitHub Actions github.com

- Architected an automated pipeline using Python and YAML to dynamically tailor technical documentation based on targeted requirement analysis.
- Reduced manual tailoring time by 90% by automating the data selection and document formatting process through an LLM-driven orchestration engine.
- Engineered automated CI/CD workflows with GitHub Actions to ensure consistent, environment-independent builds and artifact management.

Traffic Violation Detection System - AWS, JavaScript, Event-Driven Architecture github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled, resilient message processing.
- Implemented pattern matching with Regex to filter and route geographic plate data, triggering automated SES-based notification workflows.
- Leveraged S3, EventBridge, and Lambda to build a scalable, cost-efficient solution for real-time data ingestion and analysis.

Skills

Languages: Python, Java, JavaScript, SQL (MySQL), PowerShell, Bash, TypeScript, LaTeX, YAML, HTML/CSS

Skills: Pre-sales Engineering, Cloud Architecture (AWS), Data Security, SaaS Integration, CI/CD, Technical Support

Tools: Microsoft 365, Salesforce, Windows/macOS/Linux, GitHub Actions, Docker, React, Node.js, AWS SQS/S3
