Summary

High-energy Sales Development Representative with a proven track record of exceeding performance metrics in fast-paced environments. Consistently ranked as the #2 top-performing Sales Specialist at Verizon (Covington), achieving 130% of monthly quotas through outbound-focused consultative selling and technical product expertise. Skilled at quickly building rapport, qualifying leads, and translating complex technology into clear business value.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently ranked as the #2 top-performing Sales Specialist at the location, surpassing monthly quotas by 130% through technical product expertise and consultative solution-selling.
- Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.
- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Managed the full production release lifecycle, including build pipelines, environment configs, DNS, and hosting to deliver a fully operational site used by real customers.
- Built and deployed a production-ready full-stack component-driven React application, integrating external APIs to dynamically render real-time content.
- Owned the end-to-end development and deployment lifecycle of a full-stack project, ensuring high standards for code quality and performance.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Managed office hours and group labs, adapting communication methods to suit diverse student backgrounds and learning speeds.
- Mentored students on software engineering principles like documentation (Javadoc) and testing (JUnit) as foundational career skills.
- Supported a classroom of 40+ students, ensuring all learners met course objectives and foundational programming milestones.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com

- Increased trader decision-making efficiency by 40% through intuitive, real-time dashboard design.
- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com

- Automated the violation detection and notification workflow, reducing manual processing time by over 90%.
- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
