Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.
• Contributed to regional sales targets by translating technical specifications into business value for diverse customer segments.
• De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.
• Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
• Delivered a production-ready application that handled high traffic volumes with minimal infrastructure costs using serverless technologies.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Integrated real-time machine learning models (MoveNet) with React to enable low-latency, gesture-based user interaction directly in the browser.
• Architected a secure backend using Express.js and Node.js with a robust state management layer using Redux Toolkit.
• Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.

Projects

Traffic Violation Detection System - JavaScript, AWS Rekognition, Cloud Services [github.com](#)
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
• Implemented pattern matching with Regex to filter geographic plate data, ensuring accurate routing and notice generation.
• Automated the violation detection and notification workflow, reducing manual processing time by over 90%.

Network-Wide Ad Blocker (Pi-hole) - Raspberry Pi, Linux, DNS [github.com](#)
• Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
• Diagnosed and resolved network routing conflicts to ensure zero-latency ad blocking.
• Enhanced network-wide security and reduced bandwidth consumption by filtering malicious and tracking-heavy domains.

Skills

Languages: JavaScript, TypeScript, Python, Java, Go, Kotlin, C++, SQL, Shell Scripting, Tailwind CSS

Skills: Technical Pre-sales, ROI/Business Value Analysis, Data Management, Technical Troubleshooting, AI Prompting (Skilled Prompter), RESTful APIs, CI/CD, Agile/Scrum

Tools: AWS (Rekognition, S3, SQS, EventBridge), Linux, DNS, React, Node.js, Serverless, Docker, Redux Toolkit, TensorFlow.js, CRM
