

Thuy Nguyen

Sales Specialist, Verizon | Covington, LA | 2016-4-23 to 2021-6-21 | thuy.dinh@gmail.com | [linkedin.com/in/thuy-nguyen-nb30b219](https://www.linkedin.com/in/thuy-nguyen-nb30b219) | [giphy.com/members/2003978711-mosca20030707-giftrsk/](https://www.giphy.com/members/2003978711-mosca20030707-giftrsk/) | [clubgolf.com/Member/2003978711-mosca20030707-giftrsk/](https://www.clubgolf.com/Member/2003978711-mosca20030707-giftrsk/)

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.

Experience

Experience Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.

- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.

Associate Full Stack Developer, Forge Tek Studios – Remote

August 2025 – Current

- Built and deployed a production-ready full-stack application, integrating external APIs to dynamically render real-time content for users.
- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80%—focusing on performance-sensitive updates.
- Managed the full production release lifecycle, including build pipelines, environment configs, and hosting to deliver fully operational solutions.

Full Stack Developer Intern, METY Technology – Remote

September 2024 – June 2025

- Developed secure and scalable RESTful APIs with Express.js and Node.js to manage complex data flow and backend communication.
- Architected a secure backend with a robust state management layer using Redux Toolkit to ensure application stability and performance.

- Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality

- Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices, enhancing overall network security.

Projects

- Diagnosed and resolved network routing conflicts to ensure zero-latency operation and improved page load speeds by 30% through proactive blocking.

Traffic Violation Detection System - JavaScript, AWS Cloud Services

github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.

Languages: JavaScript, TypeScript, Python, Java, Go, Shell Scripting, MySQL, HTML/CSS

Skills: Solutions Engineering, Technical Sales, Identity Management, API Integration, RESTful APIs, Cloud while leveraging cloud scalability.

Computing (AWS), Network Security, CI/CD

Tools: React, Node.js, Express.js, Redux Toolkit, AWS (S3, SQS, SES), Linux, Pi-hole, Docker, Git, CRM
