Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.
• De-escalated complex technical issues by explaining bandwidth optimization and network topology to help customers make informed decisions.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Owned the end-to-end development and deployment lifecycle of full-stack projects, ensuring high standards for performance and reliability.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
• Collaborated on design and architecture decisions, advocating for efficient solutions to meet scalability and cost requirements.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Managed office hours and group labs, adapting communication methods to suit diverse backgrounds and learning speeds.
• Mentored students on software engineering principles and documentation as foundational career skills, improving success rates by 20%.
• Provided in-depth technical coaching on query optimization and Java unit testing patterns for a classroom of 40+ students.

Projects

Stock Ratio Tracker - Python, React, Perspective [github.com](#)
• Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring low-latency data updates.
• Used high-performance streaming libraries to reduce data visualization latency, increasing decision-making efficiency by 40%.
• Implemented automated unit tests to ensure calculation correctness and reliability for real-time monitoring.

Traffic Violation Detection System - Javascript, AWS Cloud Services [github.com](#)
• Automated license plate image processing from S3, routing data through SQS and EventBridge for proper handling.
• Engineered Regex to identify specific plates and managed end-to-end data flow to ensure system integrity.
• Managed notices and database updates, demonstrating high attention to detail and process documentation.

Skills

Languages: Python, TypeScript, Java, SQL (MySQL), JavaScript, HTML/CSS

Skills: Consultative Selling, Customer Relations, Data Analysis, CRM, Troubleshooting, Full-stack

Tools: Microsoft Office (Word, Excel, PowerPoint), Git, React, Node.js, AWS Cloud Services, Jira
