Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust to drive digital adoption.
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Provided in-depth technical coaching on relational schema design, query optimization, and MySQL Workbench for a classroom of 40+ students.
• Educated students in relational database design and SQL best practices, improving success rates by 20% through targeted feedback.
• Mentored students on software engineering principles and foundational programming milestones, adapting teaching methods to suit diverse backgrounds.

Coding Competition Developer, Bellevue College – Bellevue, WA April 2024 – May 2025
• Built a dynamic leaderboard system using PHP and SQL for real-time performance tracking, reducing score calculation time by 40%.
• Authored automated test cases across multiple languages (Java, Python, C++, Golang) to validate participant algorithm accuracy and efficiency.
• Directed onsite technical operations for 30+ participants, ensuring a seamless competition experience and immediate technical support.

Projects

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
• Automated the violation detection and notification workflow, reducing manual processing time by over 90% through pattern matching and email automation.

Network-Wide Ad Blocker (Pi-hole) - Shell Scripting, Linux, DNS github.com
• Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
• Enhanced network-wide security and reduced bandwidth consumption by filtering malicious and tracking-heavy domains, improving page load speeds by 30%.

Skills

Languages: SQL (MySQL, PostgreSQL), Python, Java, JavaScript, PHP, Go, C++, HTML/CSS

Skills: Technical Sales, Customer Success, Relationship Building, Database Design, Query Optimization, AWS Cloud Services, Proof of Concepts (PoC)

Tools: MySQL Workbench, AWS (S3, SQS, SES), Linux, Pi-hole, CRM, Technical Troubleshooting, Git
