Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.
- Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency.
- Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Integrated real-time machine learning models (MoveNet) with React to enable low-latency, gesture-based user interaction directly in the browser.
- Architected a secure backend using Express.js and Node.js with a robust state management layer using Redux Toolkit.
- Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.

Projects

Network-Wide Ad Blocker (Pi-hole) - Raspberry Pi, Linux, DNS github.com

- Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
- Diagnosed and resolved network routing conflicts to ensure zero-latency ad blocking.
- Enhanced network-wide security and reduced bandwidth consumption by filtering malicious and tracking-heavy domains.

Stock Ratio Tracker - Python, React, Typescript, Perspective github.com

- Built a Python-based data ingestion and transformation layer to feed live financial metrics into a React-based frontend.
- Optimized real-time data streaming and state synchronization between Python processes and Perspective visualization components.
- Increased trader decision-making efficiency by 40% through intuitive, real-time dashboard design.

Skills

Languages: Python, Go, TypeScript, Java, C++, JavaScript, Shell Scripting, MySQL, Tailwind CSS

Skills: Solution Design, Pre-Sales Support, Customer Relations, Network Topology, Troubleshooting, RESTful APIs, CI/CD, Agile/Scrum

Tools: React, Node.js, Serverless, AWS, Linux, DNS, CRM, Inventory Management, Perspective, TensorFlow.js
