Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Explain technical concepts, such as bandwidth needs, signal strength, coverage maps, Wi-Fi extender logic and device compatibility to help customers make informed decisions.
• Support store operations by running diagnostics on devices, validating hardware issues, managing inventory workflows, and contributing to sales goals while maintaining integrity and transparency.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Built and deployed a production-ready full-stack component-driven React application, integrating external APIs (Steam, Fab Marketplace) to dynamically render real-time content.
• Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80%—focusing on performance-sensitive UI updates.
• Managed the full production release lifecycle, including build pipelines, environment configs, DNS, and hosting to deliver a fully operational site used by real customers.
• Designed and deployed a serverless backend to keep costs low and servers flexible for high visitor traffic.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Engineered a real-time, interaction-driven application using React and TensorFlow.js (MoveNet), processing live camera input and rendering responsive UI feedback.
• Developed secure and scalable RESTful APIs with Express.js and Node.js to manage data flow and backend communication, in frontend, used Tailwind CSS for styling and Redux Toolkits for state managing.
• Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Guided 40+ students in Java and SQL, with class materials during and after class.
• Educated students in relational database design and MySQL Workbench operations.
• Elevated student proficiency in JUnit and Javadoc, enhancing assignment quality by 20%.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com
• Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.
• Used JPMorgan Chase's open-source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com
• Processed license plate images from S3, sending email notices to offenders with violation details and fines.
• Engineered Regex to identify California plates, routed through SQS and EventBridge for proper handling.

Skills

Languages: Python, Go, TypeScript, Java, Kotlin, C++, Flutter, Next.js, JavaScript, MySQL, Tailwind CSS

Skills: Technical Discovery, Prospecting, Research, RESTful APIs, GraphQL, Full-stack, Scrum Master, Collaboration

Tools: Salesforce, Gen AI/ML, Kubernetes, React, React Native, Docker, Jira, AWS Cloud Services
