Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management and dynamic data fetching.
- Implemented high-performance API integrations with third-party platforms like Steam and Fab Marketplace, optimizing data synchronization logic to reduce load overhead by 80%.
- Managed the full production release lifecycle, delivering a production-ready application that handled high traffic volumes with minimal infrastructure costs.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Integrated real-time machine learning models (MoveNet) with React to enable low-latency, gesture-based user interaction directly in the browser, enhancing engagement by 25%.
- Architected a secure backend using Express.js and Node.js with a robust state management layer using Redux Toolkit to manage complex data flows.
- Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and high code quality standards.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com

- Architected a data-flow pipeline connecting Python backend calculations to a live React dashboard, optimizing real-time data streaming and state synchronization.
- Leveraged the Perspective library to build an intuitive, high-performance trading dashboard, increasing decision-making efficiency by 40%.
- Implemented automated unit tests to ensure ratio calculation correctness and system reliability.

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing to automate violation detection.
- Engineered Regex for geographic data filtering and identification of plate patterns, reducing manual processing time by over 90%.
- Managed the end-to-end cloud infrastructure configuration to ensure cost-effective handling of bursty traffic patterns.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS, C++ , Go

Skills: RESTful APIs, Webhooks, Data Modeling, Full-stack Development, Technical Communication, Solution Selling

Tools: React, Node.js, Express.js, AWS (Rekognition, S3, SQS), TensorFlow.js, Low-code/No-code, Git, Docker
