Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Explain complex technical concepts, such as bandwidth optimization and network topology, to diverse customer segments to facilitate informed purchasing decisions.
• Consistently surpass monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Support regional sales operations by identifying and initiating partnerships with strategic business clients, serving as their primary technical point of contact.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Managed the full production release lifecycle of a React application, coordinating between technical stakeholders and external API providers like Steam and Fab Marketplace.
• Optimized data synchronization and system performance, reducing load overhead by 80% through careful analysis of UI updates and backend data modeling.
• Designed a serverless backend to handle high traffic volumes efficiently, ensuring project deliverables met scalability and cost-compliance requirements.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Mentored 40+ students on software engineering principles, including technical documentation (Javadoc) and rigorous testing (JUnit) as foundational project skills.
• Facilitated workshops on relational database design and MySQL Workbench, translating abstract engineering concepts into actionable student projects.
• Improved assignment quality by 20% through targeted technical feedback and clear communication of project requirements and milestones.

Projects

Stock Ratio Tracker - Python, React, Typescript [github.com](#)
• Architected a data-flow pipeline connecting backend calculations to a live dashboard, ensuring stable, low-latency updates for real-time monitoring.
• Leveraged high-performance streaming libraries to reduce visualization latency, increasing decision-making efficiency by 40% through intuitive interface design.

Traffic Violation Detection System - JavaScript, AWS Cloud Services [github.com](#)
• Engineered an automated violation notification workflow using AWS Rekognition and event-driven architecture, reducing manual processing time by over 90%.
• Implemented pattern-matching logic to filter geographic data and route event-driven alerts, ensuring accurate handling of project-specific contract requirements.

Skills

Languages: Python, SQL (MySQL), Java, JavaScript, TypeScript, C++, HTML/CSS, Go

Skills: Technical Documentation, Proposal Support, Solution Selling, Data Modeling, Project Lifecycle Management

Tools: Microsoft Office (Excel, Word, PowerPoint), AWS, React, Node.js, Git, Docker, Javadoc, JUnit
