Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.
• Contributed to regional sales targets by translating technical specifications into business value for diverse customer segments.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.
• Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.
• Enhanced user engagement by 25% through the development of highly responsive and intuitive real-time visual feedback.
• Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint.

Projects

Network-Wide Ad Blocker (Pi-hole) - Raspberry Pi, Linux, DNS github.com
• Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
• Diagnosed and resolved network routing conflicts to ensure zero-latency ad blocking.
• Verified system behavior through log inspection, connectivity testing, and iterative configuration changes to ensure stable and reliable operation.

Traffic Violation Detection System - JavaScript, AWS Rekognition, Cloud Services github.com
• Automated the violation detection and notification workflow, reducing manual processing time by over 90%.
• Reduced system costs by leveraging serverless AWS services to handle bursty traffic patterns efficiently.
• Engineered Regex to identify California plates, routing events through SQS and EventBridge to trigger SES-based email notices.

Skills

Languages: Java, Python, TypeScript, JavaScript, Shell Scripting, MySQL, HTML/CSS

Skills: Pre-sales, Consultative Selling, DevSecOps, CI/CD Automation, RESTful APIs, Cloud Computing

Tools: Git, GitHub Actions, Docker, Kubernetes, Maven, NPM, AWS (S3, SQS, SES), Jenkins, Nexus
