Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Explain complex technical concepts, such as network topology and device compatibility, to help customers make informed decisions in a fast-paced environment.
• Conduct hardware diagnostics and validate firmware issues to ensure system reliability and long-term customer success.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Provided in-depth technical coaching and procedural support on complex systems to a classroom of 40+ students with diverse backgrounds.
• Facilitated workshops for technical visualization and management, improving success rates and foundational proficiency by 20%.
• Mentored students on engineering principles like verification and documentation as foundational practices for building stable and secure systems.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Built and deployed production-ready applications, integrating external APIs to dynamically render real-time content while maintaining high standards for performance.
• Optimized data synchronization and rendering logic, reducing ingestion overhead by 80% to support high-traffic, performance-sensitive environments.
• Owned the end-to-end development lifecycle of technical projects, ensuring reliability and maintainability for real-world users.

Projects

Automated Document Generation Pipeline - Python, YAML, GitHub Actions github.com
• Architected an automated pipeline using Python and YAML to dynamically tailor technical documentation based on targeted requirement analysis.
• Reduced manual tailoring time by 90% by automating the data selection and document formatting process through an LLM-driven orchestration engine.
• Engineered automated CI/CD workflows with GitHub Actions to ensure consistent, environment-independent builds and artifact management.

Traffic Violation Detection System - AWS, JavaScript, Event-Driven Architecture github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled, resilient message processing.
• Implemented pattern matching with Regex to filter and route geographic data, triggering automated notification workflows.
• Leveraged S3, EventBridge, and Lambda to build a scalable solution for real-time data ingestion and analysis.

Skills

Languages: Python, Java, JavaScript, SQL, PowerShell, TypeScript, LaTeX, YAML

Skills: Consultative Sales, Procedural Support, Technical Coaching, Cloud Architecture (AWS), CI/CD, Problem Solving

Tools: CRM (Salesforce), Windows/macOS/Linux, GitHub Actions, Docker, React, Node.js, AWS Rekognition
