Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers, acting as a trusted advisor.
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
• Conducted hardware diagnostics and firmware validation on mobile devices and networking equipment to ensure optimal performance and customer success.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Built and deployed a production-ready full-stack component-driven React application, integrating external APIs to dynamically render real-time content for enterprise users.
• Managed the full production release lifecycle, including build pipelines, environment configs, DNS, and hosting to deliver stable, high-performance web applications.
• Designed and deployed a serverless backend to handle high visitor traffic efficiently while maintaining strict data integrity and security standards.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024
• Mentored students on software engineering principles like documentation and testing, adapting communication styles to suit diverse technical and non-technical backgrounds.
• Managed office hours and group labs for 40+ students, fostering a collaborative learning environment and providing technical perspective on complex coding challenges.
• Elevated student proficiency in JUnit and SQL relational database design, contributing to a 20% improvement in overall assignment quality.

Projects

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com
• Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
• Automated the violation detection and notification workflow, reducing manual processing time by over 90% while ensuring accurate data handling.

Network-Wide Ad Blocker (Pi-hole) - Linux, Shell Scripting, DNS github.com
• Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices, enhancing data protection.
• Diagnosed and resolved network routing conflicts and verified system behavior through log inspection to ensure zero-latency, reliable operation.

Skills

Cybersecurity & Networking: Data Protection, DNS, Linux, Active Directory, M365, Network Topology
Technical Skills: AWS Cloud Services, Serverless Architecture, React, RESTful APIs, SQL, Python
Communication: Technical Presentations, Consultative Sales, Mentorship, Problem Solving
