Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust to drive growth.
- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.
- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- Explain technical concepts, such as signal propagation and network topology, to help customers make informed decisions and de-escalate complex technical issues.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Architected and deployed a production-ready full-stack React application, integrating third-party APIs (Steam, Fab Marketplace) to dynamically render real-time content.
- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80% while ensuring performance-sensitive UI updates.
- Leveraged custom hooks and context for efficient state management in a modular frontend architecture with a serverless backend.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Integrated real-time machine learning models (TensorFlow.js) with React to enable low-latency, gesture-based user interaction directly in the browser.
- Developed secure and scalable RESTful APIs with Express.js and Node.js to manage complex data flow and backend communication for interactive applications.
- Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.

Projects

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
- Automated the violation detection and notification workflow, reducing manual processing time by over 90% through pattern matching and email automation.

Stock Ratio Tracker - Python, React, Typescript github.com

- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard using JPMorgan Chase's Perspective library.
- Implemented automated unit tests to ensure correctness and reliability of live data feeds for financial monitoring.

Skills

Languages: Python, JavaScript, TypeScript, Java, Go, MySQL, HTML/CSS

Skills: Pre-Sales, Solution Design, Account Management, Relationship Building, API Integration, AWS (S3, SQS, EventBridge), Machine Learning, CI/CD

Tools: React, Node.js, TensorFlow.js, AWS Amplify, Docker, Git, CRM, Technical Troubleshooting
