Summary

Results-driven Pre-Sales Engineer with a BS in Computer Science and a proven track record of high-velocity performance. Consistently ranked as the #2 top-performing Sales Specialist at Verizon (Covington), achieving 130% of sales targets through technical expertise and consultative solution-selling. Skilled in cloud security (AWS), event-driven architectures, and technical presentations, with a strong ability to translate complex security challenges into actionable business value.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently ranked as the #2 top-performing Sales Specialist at the location, surpassing monthly quotas by 130% through technical product expertise and consultative solution-selling.
- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
- Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Built and deployed a production-ready full-stack component-driven React application, integrating external APIs to dynamically render real-time content.
- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80%—focusing on performance-sensitive UI updates.
- Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Managed office hours and group labs, adapting teaching methods to suit diverse student backgrounds and learning speeds.
- Mentored students on software engineering principles like documentation (Javadoc) and testing (JUnit) as foundational career skills.
- Provided in-depth technical coaching on relational schema design, query optimization, and Java unit testing patterns.

Projects

Traffic Violation Detection System - Javascript, AWS Cloud Services [github.com](#)

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
- Automated the violation detection and notification workflow, reducing manual processing time by over 90%.
- Managed the end-to-end cloud infrastructure configuration and deployment of the detection system.

Stock Ratio Tracker - Python, React, Typescript [github.com](#)

- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.
- Evaluated and selected industry-standard financial visualization tools to deliver a production-quality dashboard experience.

Skills

Languages: Python, JavaScript, TypeScript, Java, Go, SQL (MySQL), CSS (Tailwind)

Skills: Pre-Sales Engineering, Cybersecurity, Vulnerability Management, Cloud Security (AWS), Event-Driven Architecture, Technical Presentations

Tools: Tenable (Nessus), AWS (S3, SQS, SES, Rekognition), React, Node.js, Docker, Git, REST/GraphQL APIs
