Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current
• Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.

- Developed ongoing relationships with strategic business partners by identifying their long-term growth potential and tailoring technical solutions to their specific needs.
- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical stakeholders.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Owned the end-to-end development and deployment lifecycle of a full-stack project, ensuring high standards for code quality and performance.

- Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
- Collaborated on design and architecture decisions, advocating for serverless solutions to meet scalability and cost requirements.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.

- Took the lead on the frontend state management architecture, establishing Redux best practices for the team.
- Mentored junior interns on machine learning integration and API development, fostering a collaborative and learning-oriented environment.

Projects

Resume Automation MCP - LaTeX, YAML, GitHub Actions github.com
• Defined the technical architecture for automated document generation, establishing standards for programmatic data management and CI/CD workflows.

- Reduced manual resume tailoring time by 90% by automating data selection and document formatting through an LLM-driven pipeline.
- Configured GitHub Actions workflows to automate LaTeX compilation and artifact management, ensuring consistent, environment-independent builds.

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com
• Managed the end-to-end cloud infrastructure configuration and deployment of an event-driven serverless pipeline on AWS.

- Automated the violation detection and notification workflow, reducing manual processing time by over 90%.
- Reduced system costs by leveraging serverless AWS services to handle bursty traffic patterns efficiently.

Skills

Languages: Python, Go, TypeScript, Java, JavaScript, SQL, C++ , YAML, LaTeX, Tailwind CSS

Skills: Kubernetes, Cloud-Native, RESTful APIs, CI/CD, Event-Driven Architecture, Full-stack, Agile/Scrum

Tools: Docker, GitHub Actions, AWS (S3, SQS, SES, EventBridge), React, Node.js, Redux Toolkit, Jira, Perspective
