Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to non-technical customers.
- Conducted hardware diagnostics and firmware validation on mobile devices and networking equipment to ensure optimal performance and connectivity.
- Took ownership of inventory management and hardware validation cycles, ensuring 100% accuracy in stock records and device readiness for participant use.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Engineered a real-time, interaction-driven application using React and TensorFlow.js (MoveNet), processing live camera input and rendering responsive UI feedback.
- Enhanced user engagement by 25% through the development of highly responsive and intuitive real-time visual feedback systems.
- Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint to ensure data integrity.

Front Desk Assistant, Public Safety Department, Bellevue College – Bellevue, WA June 2023 – August 2023

- Managed campus security data and documentation using Excel and advanced Outlook scheduling tools with high attention to detail.
- Improved administrative efficiency by organizing digital records and streamlining visitor check-in processes for on-site participants.
- Coordinated with public safety officers to manage campus-wide communication and logistics, ensuring accurate data handling under FERPA guidelines.

Projects

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
- Automated the violation detection and notification workflow, reducing manual processing time by over 90% through accurate license plate identification.

MNIST Handwritten Digit Classifier - Python, NumPy Library github.com

- Engineered a multi-layer perceptron architecture from scratch, implementing forward and backward propagation to classify handwritten digits (0-9).
- Attained 90%+ classification accuracy on the standard MNIST benchmark, verifying model correctness and deep understanding of machine learning fundamentals.

Skills

Data & Operations: Data Moderation, Data Collection, MS Office (Excel, Word, Outlook), Device Troubleshooting

AI/ML Skills: TensorFlow.js, AWS Rekognition, Neural Networks, Data Labeling, Quality Assurance

Tools: CRM (Salesforce), Inventory Management, Git, AWS Cloud Services, React, Python, JavaScript
