Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through consultative solution-selling and technical product expertise.
- Developed and maintained ongoing relationships with strategic business partners, identifying long-term growth potential and tailoring solutions to their specific needs.
- Streamlined inventory workflows and device diagnostic processes, reducing customer wait times and improving store operational efficiency.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Owned the end-to-end development and deployment lifecycle of production-ready applications, ensuring high standards for performance and user experience.
- Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
- Delivered a full-stack component-driven React application, integrating external APIs to dynamically render real-time content for high visitor traffic.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Enhanced user engagement by 25% through the development of highly responsive and intuitive real-time visual feedback for interaction-driven applications.
- Automated testing and deployment processes via a custom CI/CD pipeline on AWS Amplify, ensuring consistent delivery and quality standards.
- Architected a secure backend using Express.js and Node.js with a robust state management layer using Redux Toolkit.

Projects

Resume Automation MCP - Python, LLM, GitHub Actions github.com

- Reduced manual administrative time by 90% by automating complex data selection and document formatting processes through an LLM-driven pipeline.
- Established a versioned “Source of Truth” for professional data, enabling instant iteration and consistent messaging across diverse workflows.
- Engineered an automated CI/CD workflow using GitHub Actions to ensure reliable, environment-independent document generation.

Stock Ratio Tracker - Python, React, TypeScript github.com

- Architected a data-flow pipeline connecting backend calculations to a live dashboard, ensuring stable, low-latency updates for critical decision-making.
- Implemented automated unit tests to ensure correctness and reliability of data ingestion, focusing on maintaining system integrity under high-volume conditions.
