Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- De-escalated complex technical issues by explaining bandwidth optimization, signal propagation, and network topology to diverse stakeholders to ensure informed decision-making.
- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling of wireless network solutions.
- Conducted hardware diagnostics and firmware validation on mobile devices and networking equipment to ensure optimal performance and security compliance.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Owned the end-to-end development and deployment lifecycle of mission-critical web applications, ensuring high standards for code quality and system performance.
- Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management and scalability.
- Managed full production release cycles, including environment configurations and build pipelines, to deliver robust solutions used by real-world customers.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Architected secure and scalable RESTful APIs using Express.js and Node.js to manage high-volume data flow and backend communication in real-time applications.
- Automated testing and deployment processes via custom CI/CD pipelines on AWS Amplify, ensuring consistent delivery and rigorous quality standards.
- Took the lead on frontend state management architecture, establishing industry best practices for responsive UI and real-time interaction feedback.

Projects

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com

- Engineered a mission-critical detection pipeline using AWS Rekognition to process license plate data, routing alerts through EventBridge for real-time handling.
- Implemented complex regex and automated workflows to identify and process regional data, ensuring high accuracy in automated notification systems.

Resume Automation MCP - Python, LLM, GitHub Actions github.com

- Architected a document generation system using LaTeX and YAML, implementing a strict separation of concerns between data storage and rendering.
- Configured automated GitHub Actions workflows for environment-independent builds, demonstrating a deep understanding of CI/CD and deployment automation.

Skills

Languages: Python, TypeScript, SQL, LaTeX, YAML, JavaScript, Java, CSS, HTML, Go

Skills: Sales Engineering, Technical Demonstration, IP Networking, Cybersecurity Principles, API Integration, RFP/RFI Response Development

Tools: AWS Cloud Services (Rekognition, Amplify, S3), Git, GitHub Actions, CRM Systems, React, Docker, Node.js
