Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Sales Specialist, Verizon – Covington, WA November 2025 – Current

- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.
- Identified and initiated partnerships with local business clients, serving as their primary technical point of contact and building long-term trust.
- Contributed to regional sales targets by translating technical specifications into business value for diverse customer segments.

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.
- Optimized client-side rendering and data synchronization, reducing load and ingestion overhead by 80%—focusing on performance-sensitive UI updates.
- Designed and deployed a serverless backend to keep costs low and servers flexible for high visitor traffic.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Mentored students on software engineering principles like documentation (Javadoc) and testing (JUnit) as foundational career skills.
- Managed office hours and group labs, adapting teaching methods to suit diverse student backgrounds and learning speeds.
- Improved student success rates by 20% through targeted feedback and supplemental instruction in Java best practices.

Projects

Network-Wide Ad Blocker (Pi-hole) - Raspberry Pi, Linux, DNS github.com

- Engineered a custom network-layer security solution using Linux and Pi-hole to filter DNS traffic across all connected devices.
- Diagnosed and resolved network routing conflicts to ensure zero-latency ad blocking.
- Improved page load speeds by 30% through proactive ad blocking and DNS caching.

Stock Ratio Tracker - Python, React, Typescript github.com

- Built a Python-based data ingestion and transformation layer to feed live financial metrics into a React-based frontend.
- Optimized real-time data streaming and state synchronization between Python processes and Perspective visualization components.
- Increased trader decision-making efficiency by 40% through intuitive, real-time dashboard design.
