Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Owned the end-to-end development and deployment lifecycle of a full-stack project, ensuring high standards for code quality and performance.
- Built and deployed a production-ready TypeScript React website integrating 2 external APIs (Steam, Fab Marketplace), handling 5,000+ monthly active users with automatic scaling and real-time game/asset data.
- Automated CI/CD pipeline with GitHub Actions for daily deployments to Vercel, registered DNS via Cloudflare, and implemented GA4 tracking across 15+ user behavior events.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025

- Facilitated weekly stand-ups and sprint retrospectives as Scrum Master, keeping the team aligned on OED project goals and unblocking dependencies.
- Drove 2 ticket resolutions as Scrum Master, meeting all sprint deadlines and client expectations through proactive coordination and agile ceremonies.
- Implemented database integration tests and submitted 2 MRs adhering to CI/CD pipeline standards, achieving 100% code review approval.

Account Representative, Verizon – Covington, WA November 2025 – April 2026

- Used CRM and diagnostics data to profile SMB accounts, aligning device and service recommendations with customer technical requirements.
- Started and nurtured SMB relationships through 70+ cold calls and targeted emails weekly, building pipeline trust and improving conversion quality.
- Applied technical knowledge of bandwidth, devices, and connectivity to propose small business solutions that minimized downtime and supported growth.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com

- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.
- Used JPMorgan Chase's open-source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.
- Implemented automated unit tests to ensure correctness and reliability.

Traffic Violation Detection System - Javascript, AWS Cloud Services github.com

- Architected an event-driven serverless pipeline on AWS, integrating Rekognition for image analysis and SQS for decoupled message processing.
- Automated the violation detection and notification workflow using SQS and EventBridge, reducing manual processing time by over 90%.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML, CSS, Bash

Skills: Agile/Scrum, Scrum Master, Full-stack Development, RESTful APIs, Database Testing, Business Needs Analysis, Customer Relations, Client Coordination

Tools: Azure, AWS Cloud Services (S3, SQS, EventBridge, SES), React, Node.js, Vercel, Cloudflare, Docker, Git, CRM, Jira
